

Bharath E

Software Developer | VB.NET & SQL Server

Tenkasi, Tamil Nadu, India | +91 75300 17192 | bharath.devstudio@gmail.com

linkedin.com/in/bharath-soft | github.com/bharathdevstudio-tech

Professional Summary

Software Developer with hands-on experience developing, enhancing, and supporting business applications using VB.NET, WinForms, SQL Server, and Crystal Reports. Experienced in requirements analysis, database design, CRUD module development, debugging, testing, implementation support, production issue resolution, reporting, and end-user guidance. Able to translate operational requirements into maintainable desktop solutions with reliable transaction processing, accurate data handling, and practical user interfaces.

Technical Competencies

Programming: VB.NET, .NET Framework, OOP, Windows Forms, JavaScript (ES6+), HTML5, CSS3

Web Frameworks: React.js, Next.js, Express.js, Node.js, Bootstrap, responsive UI development

Web Development: React Hooks, reusable components, React Router, REST API integration, JSON, Fetch/Axios

Database Development: SQL Server, T-SQL, schema design, stored procedures, views, functions, joins, CRUD, MongoDB

Desktop UI & Reporting: DataGridView, Crystal Reports, form validation, dynamic grid configuration, report integration

Development & Support: SDLC, requirements analysis, debugging, functional/system testing, root cause analysis, bug fixing

Networking: TCP/IP, IPv4 addressing, DNS, DHCP, LAN/WAN, Wi-Fi, routers, switches, ping, ipconfig, troubleshooting

Tools & Technologies: Visual Studio, SSMS, Git, application support, database maintenance, production issue resolution

Professional Experience

Application Developer, VISTAWIN SOLUTION

Tenkasi, Tamil Nadu | March 2026 – Present

- Develop, maintain, and support desktop business applications using VB.NET, WinForms, SQL Server, and Crystal Reports.
- Build new modules and reusable data-entry screens with validation, search, edit, delete, calculation, and reporting workflows based on business requirements.
- Design and maintain SQL Server tables, relationships, stored procedures, views, functions, and T-SQL queries for transaction-oriented applications.
- Configure dynamic DataGridView interfaces and integrate Crystal Reports for operational, transaction, and management reporting.
- Reproduce application and database issues, identify root causes, implement corrective fixes, and validate changes before release.
- Support implementation, database maintenance, user guidance, and production issue resolution throughout the application lifecycle.

Software Developer Intern, SaiKet Systems

Internship | June 2026 – July 2026

- Completed practical software development tasks involving application logic, debugging, testing, and technical documentation within a structured development workflow.

Relevant Projects

E-commerce Website

React.js, Node.js

- Developed a responsive React.js e-commerce interface with reusable components for product browsing, product details, and shopping cart workflows.
- Integrated the React.js frontend with Node.js REST APIs for product data and order processing, including input validation and error handling.

Finance and Loan Management Application

VB.NET, WinForms, SQL Server

- Built modules for customer profiles, loans, guarantors, nominees, bank details, centres, receipts, and payment records.
- Created database tables, stored procedures, queries, and reporting logic for loan calculations, transaction processing, and record tracking.

Dynamic Data Entry and Reporting Framework

VB.NET, DataGridView, SQL Server

- Configured metadata-driven DataGridView columns, control types, display order, validation, formatting, and alignment for reusable data-entry screens.
- Integrated SQL queries and Crystal Reports to support configurable operational reports and consistent data presentation across modules.

Education

Bachelor of Science in Botany

September 2022 – May 2025

Government Arts and Science College, Bharathiar University
